

Felt Clippies

by Linnie Pinnie Embroidery

Felties are fun and easy! You can add them to hair clips, use them as hair bow centers, pin or snap them to clothing and accessories, and the list goes on...

Basic instructions:

- Hoop one layer of medium tear away stabilizer or two layers of lightweight tear away stabilizer.
 - The first step will be an outline to show you where to place the felt. Place your felt covering the outline and resume stitching.
- The next steps will sew the details of the design. Some felt designs won't have details. Reference the designs color chart.
- Before the final outline sews, turn the hoop over and place a piece of felt on the back of the design. You can use a small piece of tape to hold it in place.
 - Resume stitching the final outline.
- Remove the felt and stabilizer from the hoop and trim carefully around the felties.
- If you are going to use them with snap clips, cut a small slit to insert the snap clip. I secure my snap clips with a drop of glue.

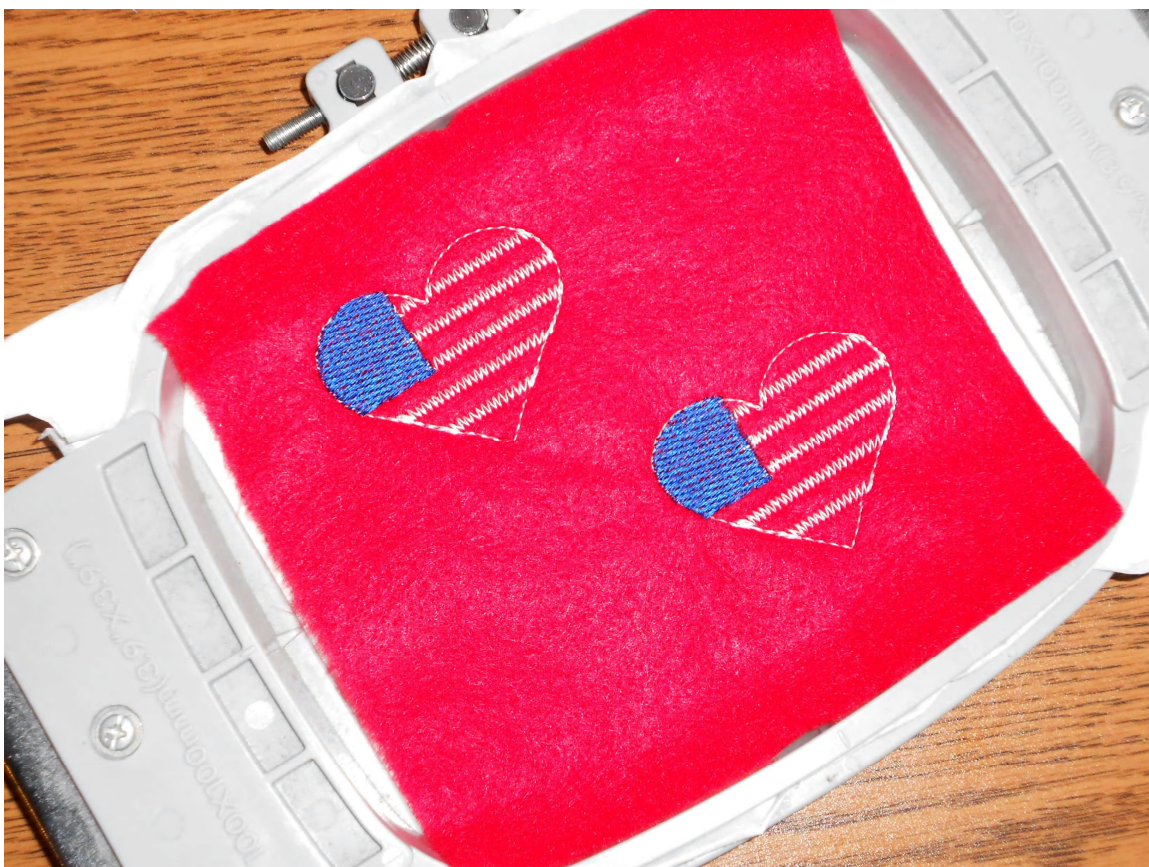

Hoop one layer of medium tear away stabilizer or two layers of lightweight tear away stabilizer

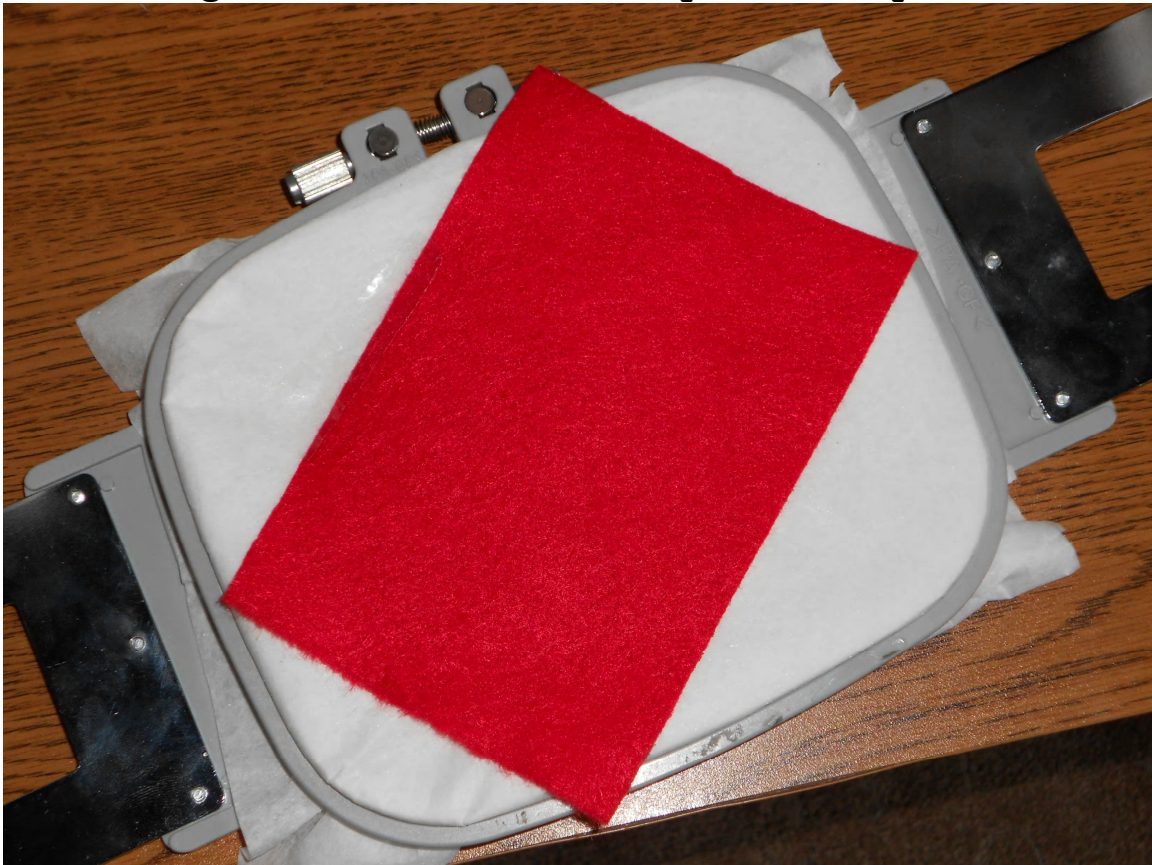

The first step will be an outline to show you where to place the felt. Place your felt covering the outline and resume stitching.

The next steps will sew the details of the design. Some felt designs won't have details. Reference the designs color chart.

Before the final outline sews, turn the hoop over and place a piece of felt on the back of the design. You can use a small piece of tape to hold it in place.

Resume stitching the final outline.

Remove the felt and stabilizer from the hoop and trim carefully around the felties.

If you are going to use them with snap clips, cut a small slit to insert the snap clip. I secure my snap clips with a drop of glue.
